Part-A - HTML Lists

1) What is a list in HTML?

A) A list in HTML is used to display a collection of related items in an Organized manner. HTML mainly provides ordered lists and unordered lists.

2) What is the difference between Ordered List and Unordered List?

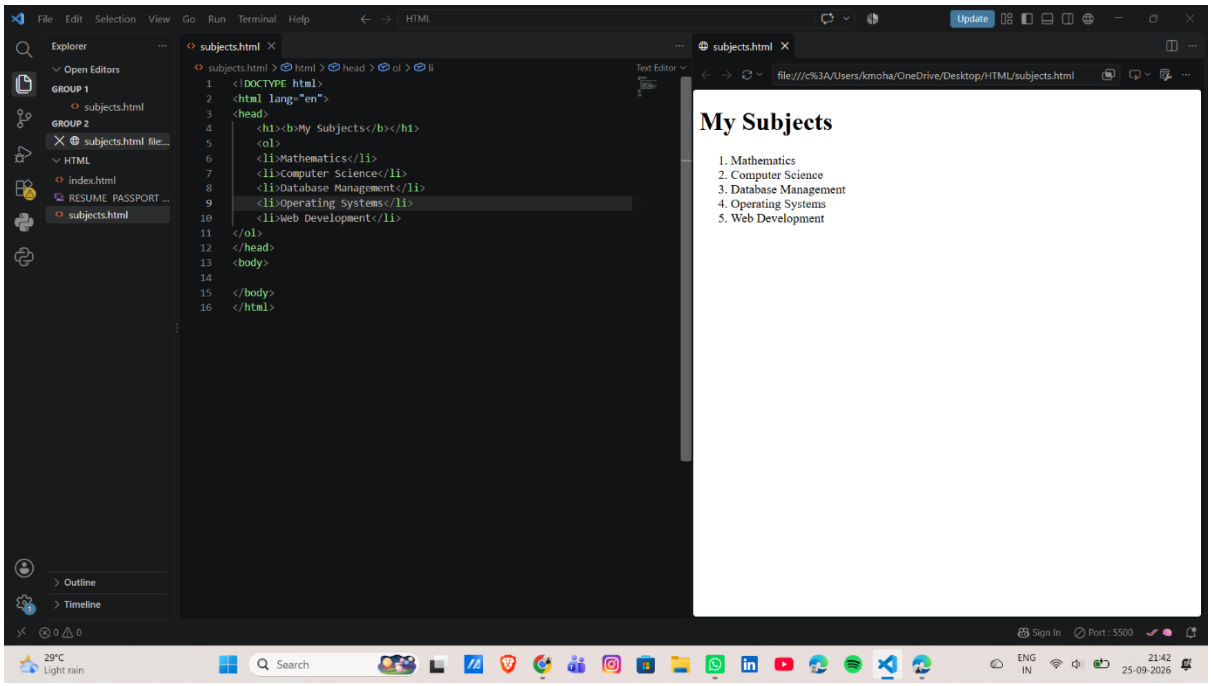

A)

Ordered List	unOrdered List
1. Items are displayed in a specific order	1. Items are displayed with bullet points.
2. Uses tag	2. Uses tag
3. Items are usually numbered	3. Items are usually shown with bullets.
4. Ex: 1, 2, 3	4. Ex: •, ○, ■

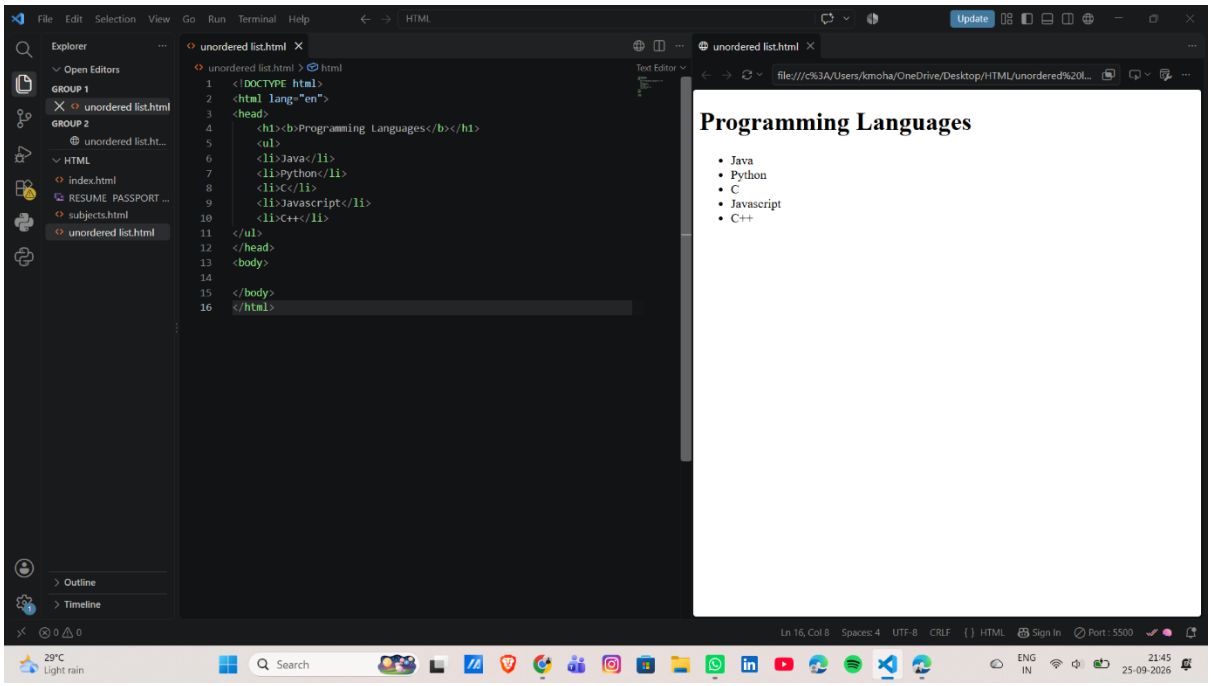

3) Write the purpose of <ol>, <ul>, and <li> tags.

A) - creates an Ordered list
 - creates an Unordered list
 - Defines an individual list item.

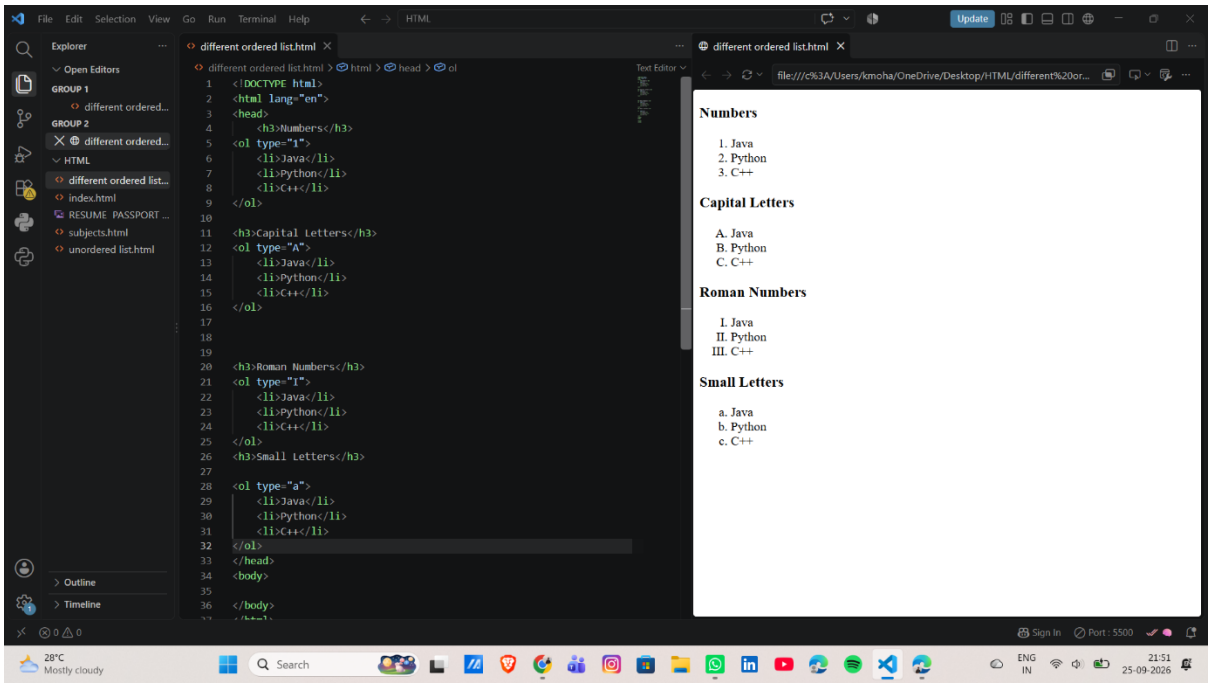

4. Create an ordered list of 5 subjects.

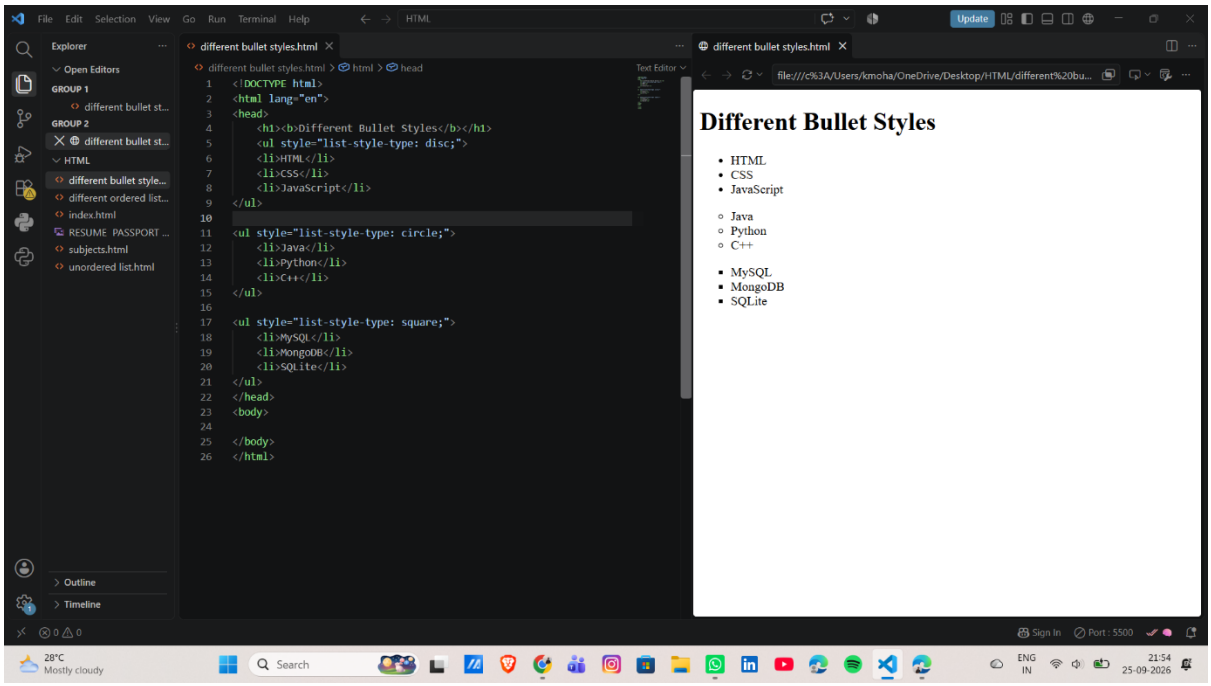

5. Create an unordered list of 5 programming languages.

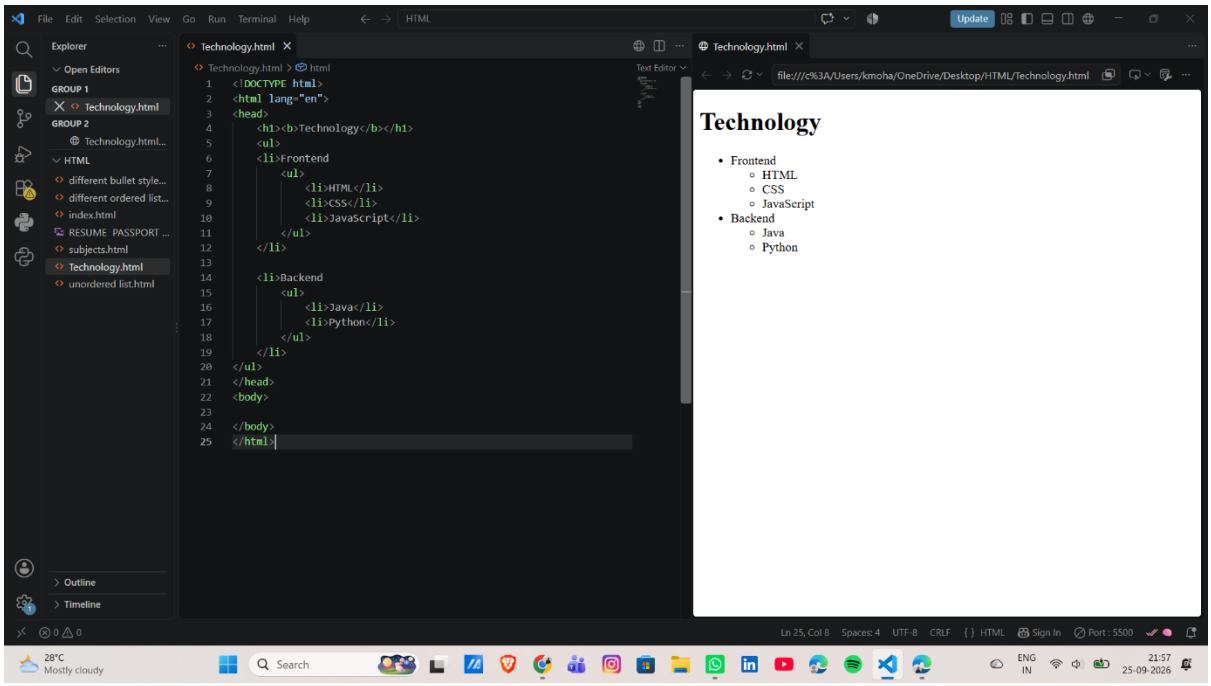

6. Create an ordered list using different numbering types.

7. Create an unordered list using different bullet styles.

8. Create a nested list.

PART-B - HTML Tables

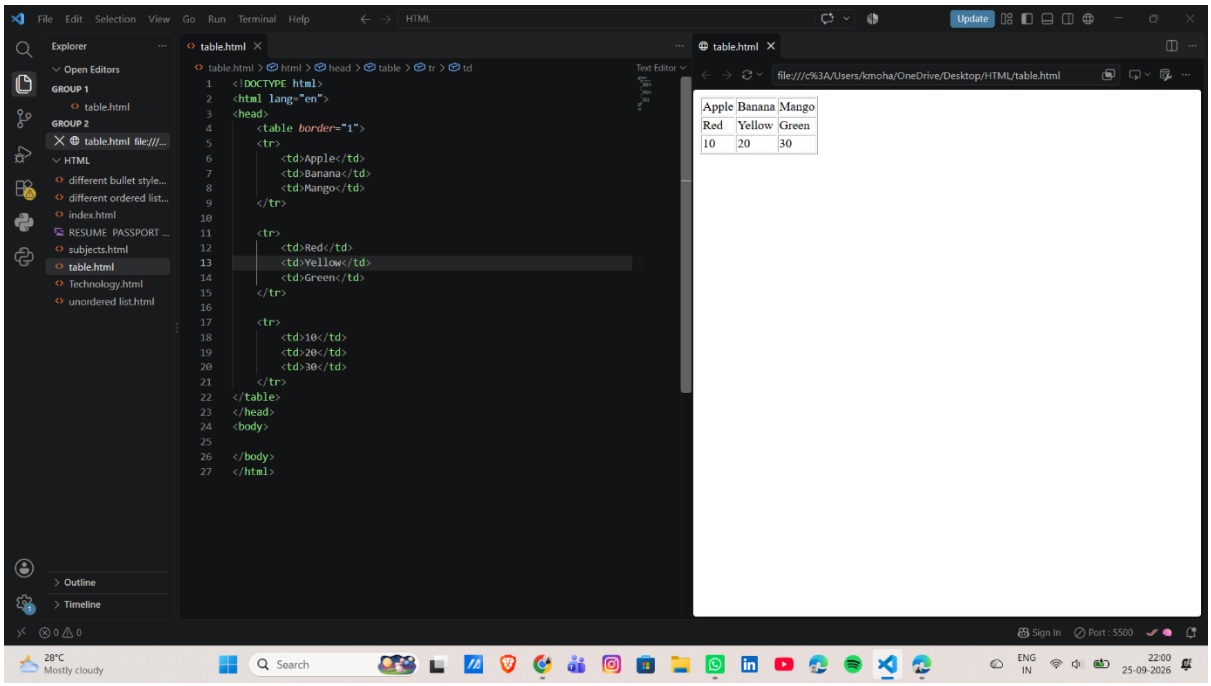

9) What is a table in HTML?

A) An HTML Table is used to display data in rows and columns. Tables are useful for displaying structured information such as student details marks, timetables, and employee information.

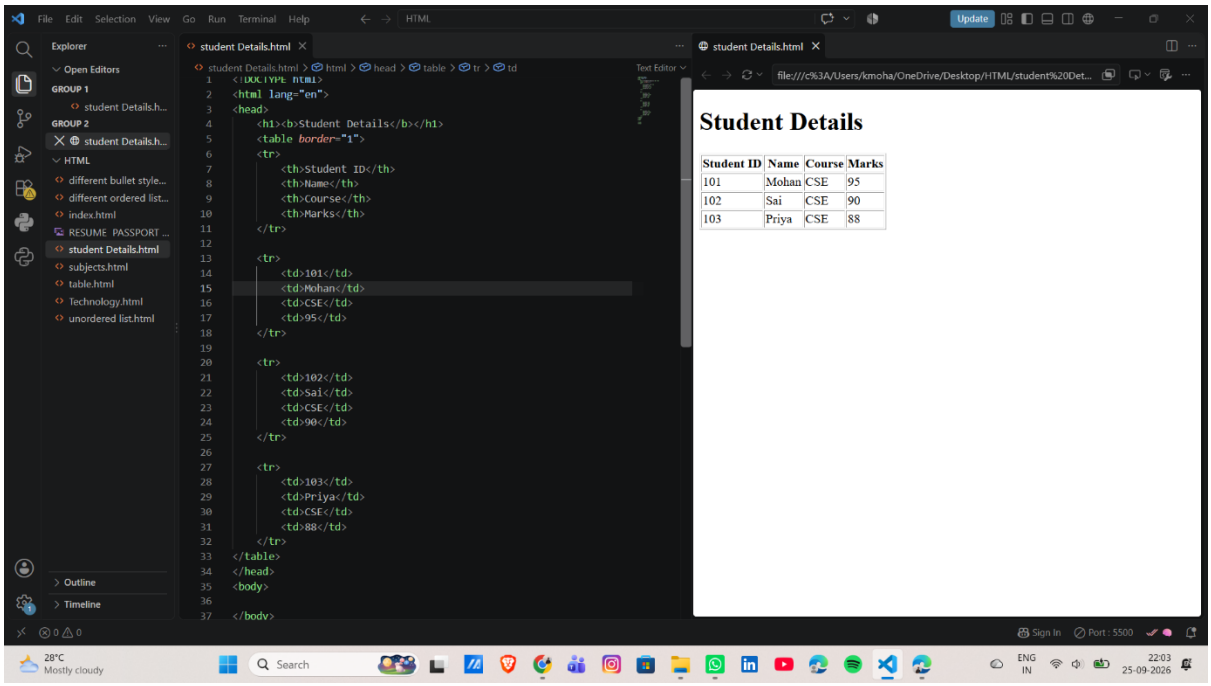

10) Write the purpose of <table>, <tr>, <th>, and <td> tags.

A) <table> - creates an HTML table
<tr> - creates a table row
<th> - creates a table heading/cell
<td> - creates a normal table data cell

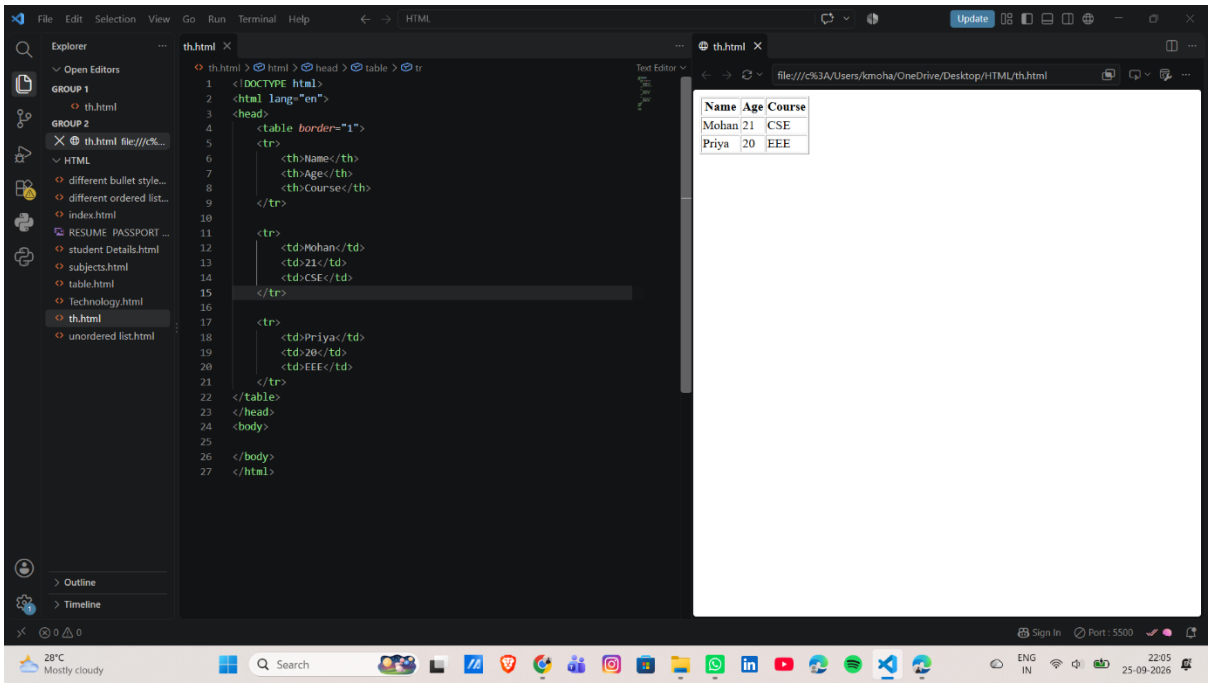

11. Create a table with 3 rows and 3 columns.

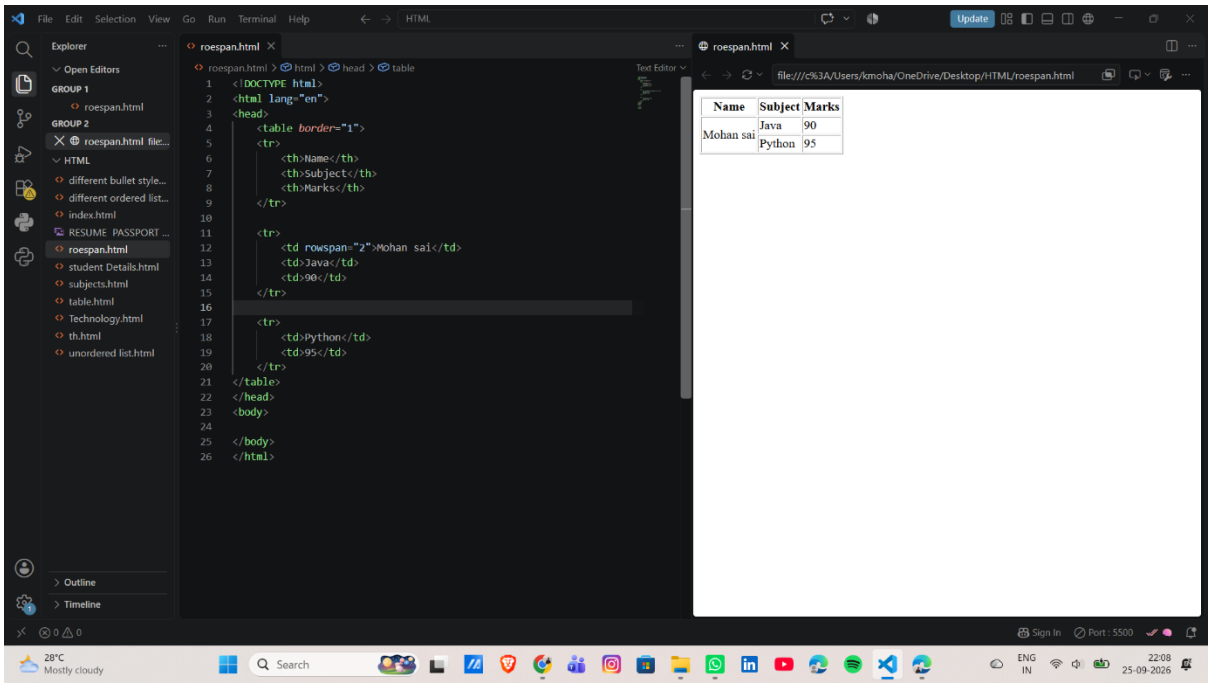

12. Create a Student Details table.

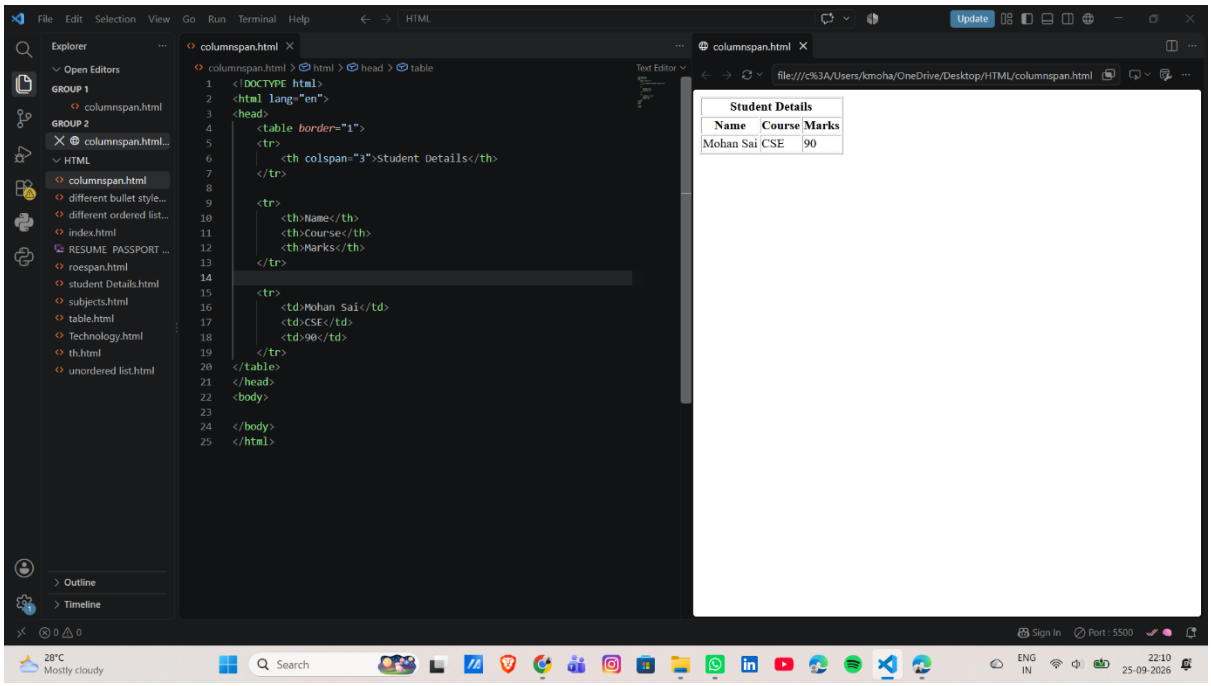

13. Create a table using <th> for headings.

14. Create a table using rowspan.

15. Create a table using colspan.

```
<!DOCTYPE html>
<html lang="en">
<head>
    <table border="1">
    <tr>
        <th colspan="3">Student Details</th>
    </tr>

    <tr>
        <th>Name</th>
        <th>Course</th>
        <th>Marks</th>
    </tr>

    <tr>
        <td>Mohan Sai</td>
        <td>CSE</td>
        <td>90</td>
    </tr>
</table>
</head>
<body>

</body>
</html>
```

Student Details		
Name	Course	Marks
Mohan Sai	CSE	90

16. Create a 5 × 5 timetable using HTML tables.

```
<!DOCTYPE html>
<html lang="en">
<head>
    <table border="1">
    <tr>
        <th>Day</th>
        <th>9:00 - 10:00</th>
        <th>10:00 - 11:00</th>
        <th>11:00 - 12:00</th>
        <th>12:00 - 1:00</th>
    </tr>

    <tr>
        <td>Monday</td>
        <td>Java</td>
        <td>DBMS</td>
        <td>HTML</td>
        <td>Maths</td>
    </tr>

    <tr>
        <td>Tuesday</td>
        <td>Python</td>
        <td>Java</td>
        <td>CSS</td>
        <td>OS</td>
    </tr>

    <tr>
        <td>Wednesday</td>
        <td>DBMS</td>
        <td>HTML</td>
        <td>JavaScript</td>
        <td>Maths</td>
    </tr>
```

Day	9:00 - 10:00	10:00 - 11:00	11:00 - 12:00	12:00 - 1:00
Monday	Java	DBMS	HTML	Maths
Tuesday	Python	Java	CSS	OS
Wednesday	DBMS	HTML	JavaScript	Maths
Thursday	OS	Python	Java	DBMS
Friday	CSS	JavaScript	Python	Project

⭐ Practical Task – Student Information Webpage

* An unordered list of your technical skills.

* An ordered list of your daily learning activities.

* A student details table.

* A timetable table.

* Use proper <table>, <tr>, <th>, <td>, <ol>, <ul>, and <li> tags.
